

Automation Platform

Enhance * Upgrade * Replace* Create!

ReLab Software's Automation Platform is designed for applications enablement—creating new powerful and complete production applications in a fraction of the time required with competitive products.

Modular	Interoperable	Easy to Use
Minimal Training	Fast Implementation	Reliable
Low Cost-of-Ownership	Multifunctional	Support fast data rates
Development/Runtime Clients	Multi-market applications	Efficient CPU Usage
Scalable	Easily Integrated	
Seasoned and Responsive Customer Service		Fast Design to Commission Time

The *modular approach* is the most efficient regardless of the application: when new technologies arise every day; when system size changes dramatically; when robustness is a must.

Using a modular approach only the elements required for the application are utilized. When additions, upgrades or enhancements become necessary on those modules effect are addressed. This provides longevity, stability and robustness to the system while maintaining the lowest cost of ownership possible and along with minimal risk.

ReLab's Automation Platform is so modular that the components can reside on different elements of the system providing a level of reliability and robustness not previously possible

Broad Application Range, Fully Interoperable, Low Cost-of-Ownership, Fast Return-on-Investment

Automation Platform

Amplify your strength with our Industrial Strength Software

ReLab Software — the solution to your automation needs!

Fully Interoperable

- ⇒ Augment ReLab's Automation Platform with other industry standard software components, knowing the ReLab platform will make them function together seamlessly.
- ⇒ Build your hardware system with the best components knowing the ReLab Automation Platform will make them function together seamlessly.
- ⇒ Install ReLab modules in your existing system to extend its useful life maintaining a low-cost-of-ownership and low risk position

Design to Implementation

- ⇒ Product are ready for use out of the box, with minimal training required
- ⇒ Applications can be designed and tested in a few hours
- ⇒ Optimized for quick configuration and ease-of-use

State of the art performance

- ⇒ Proven IEC-61850 performance, easiest product on the market to use with fastest implementation
- ⇒ IEEE C37.118 operations enabled with a complete software only solution
- ⇒ SCADA and HMI second to none

How do I benefit by using ReLab's Platform?

Save time and money:

- ⇒ Unlimited number of tags for a very competitive price. You will not have to pay a premium price for extra tags.
- ⇒ You will not have to throw away the system as it doesn't scale or you need to buy another vendor's IEDs. Imagine how much money you save by not having to re-do everything.
- ⇒ Unmatched performance, you will have to buy less instances of our software products compared to other vendors
- ⇒ Optimized for a rapid project development and deployment. You save a very significant amount of time and money by minimizing integration time.
